

**SYSTEM AND METHOD FOR PROVIDING SERVICE TO GUEST
USERS IN A WIRELESS ENTERPRISE NETWORK**

ABSTRACT

[0038] The invention presents methods and system for providing service to a guest user (24) within a wireless enterprise network (20). A location update request is received from a guest user (24) within a service area of the enterprise network (20). A guest number is allocated to the guest user (24) and the guest user (24) is registered and provided services in the enterprise network (20) as if the enterprise network (20) were a Mobile Switching Center (MSC) of the Public Land Mobile Network (PLMN) (22) of the guest user (24). The system includes a PLMN (22) supporting wireless service for a plurality of wireless terminals. The PLMN (22) includes at least one Mobile Switching Center (MSC) for registration of wireless users.
